

Correction of Aleksander B. Gundersen et al. (2024). Predicting Misinformation Beliefs Across Four Countries: The Role of Narcissism, Conspiracy Mentality, Social Trust, and Perceptions of Unsafe Neighborhoods

Journal of Social and Political Psychology, 2025, Vol. 13(1), 42–43, <https://doi.org/10.5964/jspp.17227>

Published (VoR): 2025-03-14

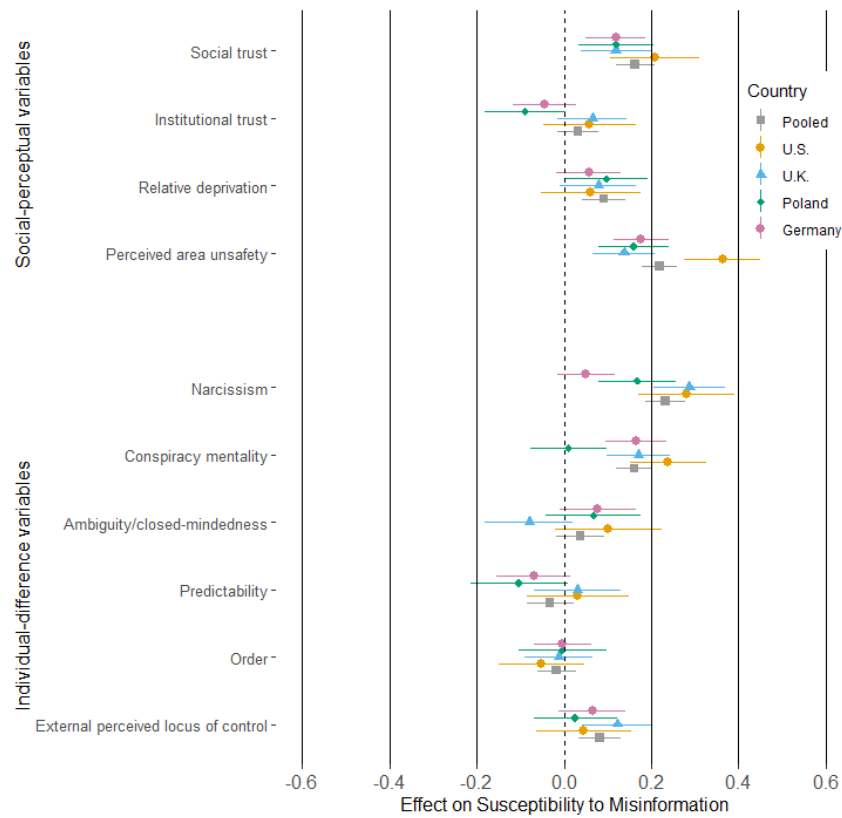

In the originally published version of

Gundersen, A. B., van der Linden, S., Piasecki, J., Rygula, R., Noworyta, K., & Kunst, J. R. (2024). Predicting misinformation beliefs across four countries: The role of narcissism, conspiracy mentality, social trust, and perceptions of unsafe neighborhoods. *Journal of Social and Political Psychology*, 12(2), 265–283. <https://doi.org/10.5964/jspp.13385>

a typographical error appeared in Figure 1. Specifically, the label for the fourth variable from the top (“Area safety”) was incorrect and did not correspond to its description in the manuscript. The correct label should be “Perceived area unsafety”, reflecting that the variable was reverse-coded and aligning with its description in the text.

The corrected version of Figure 1 is provided below. The authors apologize for any inconvenience this error may have caused.

Figure 1*Effect of Study Variables on Susceptibility to Misinformation by Country*

Note. Effects are standardized. Increased susceptibility is indicated to the right of the dotted line. 95% confidence intervals are represented by error bars.
